How to use Chart in PowerPoint

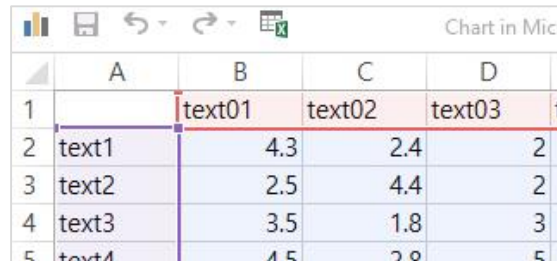

How to update the data

Step 01

1. Click anywhere in the chart.
2. [Right click](#) the chart.
3. Choose [\[Edit Data\]](#).

Step 02

A screenshot of the data table for a chart. The table has 5 rows and 4 columns (A, B, C, D). The data is as follows:

	A	B	C	D
1		text01	text02	text03
2	text1	4.3	2.4	2
3	text2	2.5	4.4	2
4	text3	3.5	1.8	3
5	text4	4.5	2.8	5

1. You'll see the data table for the chart.
2. Replace the default data with [your own information](#).
3. [Type the text](#) you want in each cell.

Step 03

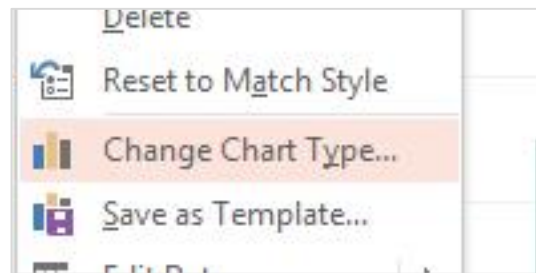

After finishing these steps, you'll find that the [chart is updated](#) automatically.

* It is recommended to use it in MS Office 2007 or later. If you use it in a later version, it may not be compatible.

How to use Chart in PowerPoint

How to update the data

Step 01

1. Click anywhere in the chart.
2. **Right click** the chart.
3. Choose {**Change Chart Type**}.

Step 02

1. You'll see a dialogue box appear.
2. **Choose the type** what you want to change.
3. Select the style considering your data.

Step 03

See the chart has been changed.

* It is recommended to use it in MS Office 2007 or later. If you use it in a later version, it may not be compatible.
